

ARCHITECTURAL TECHNICAL DEBT IN MICROSERVICES

A CROSS-COMPANY STUDY

SAULO TOLEDO, ANTONIO MARTINI

MICROSERVICES

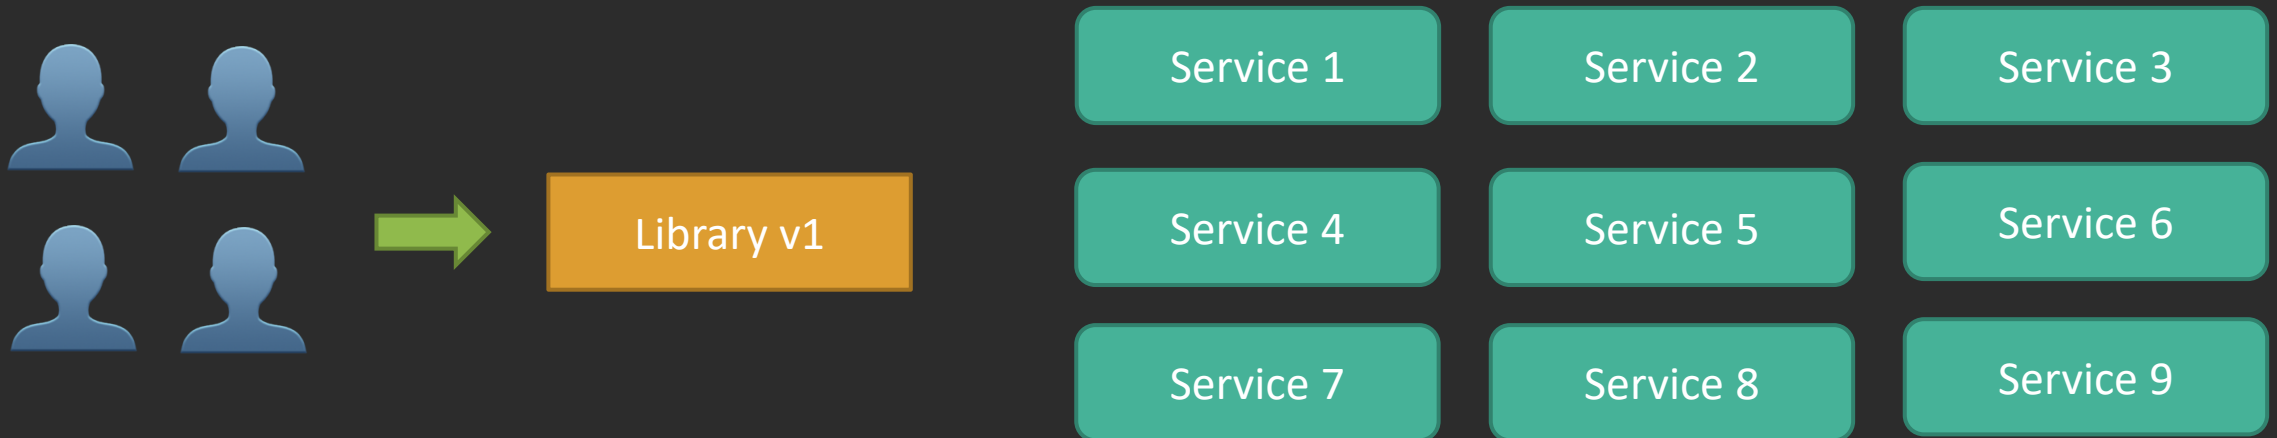

WE KNOW THAT...

- Microservices is a recent technology
 - Essential for **Continuous Delivery**
 - Loosely coupled services
 - Independent deployment and teams
- Companies face new **challenges** regarding microservices architecture
 - No well-known **best practices**
 - Negative impact of some solutions **are not known**

THE STUDY

- We currently investigated **7 cases**
 - Different contexts
 - Some TD is the same, some not
- We are sharing issues and solutions
 - Companies may **avoid costs of technical debt** by knowing:
 - **solutions tried by others**
 - drawbacks of decisions **in advance**

EXAMPLE OF FINDINGS: SHARED LIBRARIES

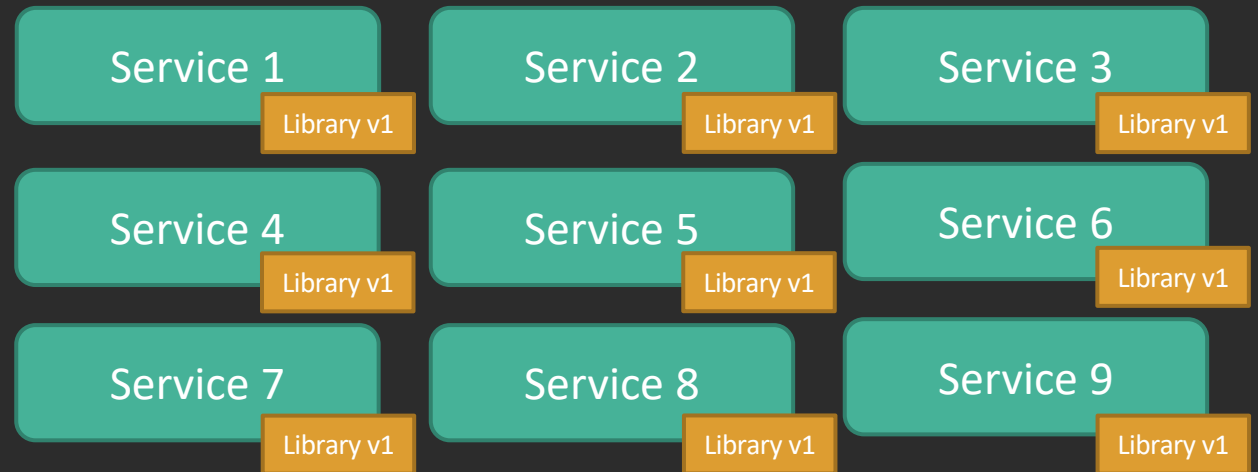

EXAMPLE OF FINDINGS: SHARED LIBRARIES

Library v1

EXAMPLE OF FINDINGS: SHARED LIBRARIES

EXAMPLE OF FINDINGS: SHARED LIBRARIES

Library v1
(deprecated)

Library v2

EXAMPLE OF FINDINGS: SHARED LIBRARIES

EXAMPLE OF FINDINGS: SHARED LIBRARIES

CONSEQUENCES OF HAVING SHARED LIBRARIES

- New releases of the libraries require **updates on every service** using them
 - A roadmap must be established to handle such changes
 - Early adopters may refuse to move to new versions
- Several versions of the libraries must be **maintained until deprecation**
- Library **use cases are frequently unknown**, leading to **breaking changes**
- **Explicit dependency** on the library developer team

WHAT TO DO WITH SHARED LIBRARIES

Service 10

Service 1

Service 2

Service 3

Service 4

Service 5

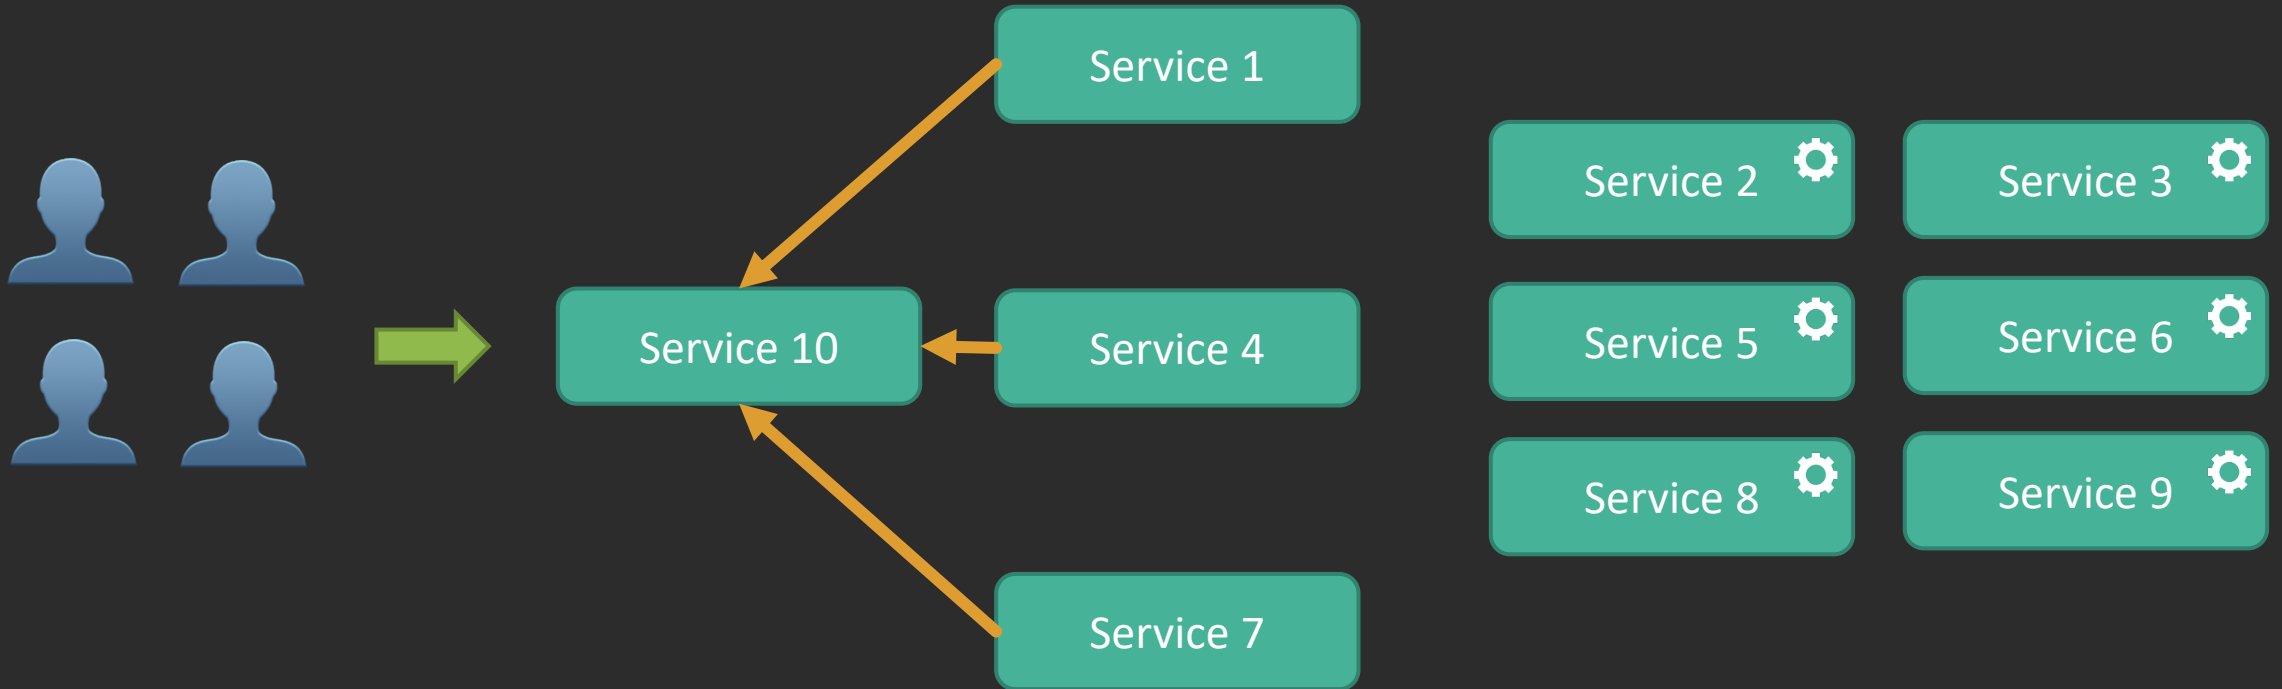

Service 6

Service 7

Service 8

Service 9

WHAT TO DO WITH SHARED LIBRARIES

BENEFITS OF THE SOLUTION

- **Small changes** can be done by the **teams themselves**
- Changes in the shared service **do not affect** the dependent services if its **API is not changed**

NEXT STEPS

- Additional cases
 - Do you want to participate? Let us know!
- Investigate **metrics** to **measure/quantify** debt, principal and interest
 - **In-depth case studies**

THANK YOU
