Welcome to a
Software Center workshop in Denmark
November 29, 2022: Bjerringbro, Denmark

At the Software Center Denmark workshop we will bring together experts from industry and academia to talk about the challenges and solutions in the software-intensive industry. Jan Bosch, director of Software Center and professor at Chalmers University of Technology will talk about industrial digitalization, including highlight cases from the member companies of Software Center. Anne Katrine Windfeld, Head of Software Development and interim Head of Digital Development at Grundfos, and Niels Jørgen Strøm, Chief Software Architect at Grundfos, will share their insights on digitalization strategies and the importance of collaboration within the industrial ecosystem. The workshop is an open event and will take place at Grundfos in Bjerringbro.

Time: 13:00 – 16:00
Place: Grundfos, Bjerringbro, Denmark
Poul Due Jensens Academy, Poul Due Jensens Vej 21, DK-8850 Bjerringbro
Agenda: https://www.software-center.se/event/denmark/
Registration: https://forms.gle/DvCCW55M9xvXim9WA

About Grundfos

We are more than just a water pump company. We believe that every drop of water has the power to change the world, and we’re all about unlocking that potential. Because where others see problems, we see opportunities.

Water has always been the heart and soul of Grundfos. That is why we are driven to pioneer solutions to the world’s water and climate challenges and improve quality of life for people. This purpose is central to everything we do and is supported by our six core values.

We believe that if you have the capabilities, you have an obligation to positively impact the planet. Our brands help us to achieve this, playing crucial roles in our purpose of pioneering solutions to the world’s water challenges and improving the quality of life for people.

We rely heavily on our strategic partnerships. Collaborating with our partners is key in managing end-to-end innovation that not only provides end-customer value, but also pioneers solutions to the world’s water and climate challenges. We are driven by collaboration and the possibilities we can bring to life together. Because together, we can achieve more.
